

Corel Education Licensing

Corel offers some of the easiest and most intuitive world-renowned design products that enable students to learn quickly and build lifelong design skills.

Big Savings

Students and teachers can benefit from education licenses that are typically **75% less** than commercial pricing. We offer discount breaks that start from as few as 5 users, and continue to scale and discount further. Schools, colleges and universities can also equip their entire institution with a **Corel Academic Site License** (known as CASL) – an incredible discounted site-wide subscription license which features up to seven of Corel's leading software products. This option provides even greater saving gains when compared to purchasing individual educational licenses.

Benefits

Flexible License Options

Corel education licenses can be purchased across our range of products including **CorelDRAW®**, **Corel Painter®**, **Corel PaintShop® Pro**, **Corel VideoStudio® Pro**, and **Pinnacle® Studio**, as a single-named user for teachers, staff, and students using their own devices. Plus the license can scale to cover multiple seats to suit any size, from small departments through to large university installations. Our products are also available to purchase as part of an affordable multi-product classroom license or as a multi-product, site-wide installation with the Corel Academic Site License.

Leading-edge technology

With advancements in Corel's technologies, utilizing artificial intelligence, students can craft and personalize with full personal control and creative flair. This is powerfully evident in CorelDRAW® Graphics Suite's LiveSketch™ tool, which allows students to transform creative ideas into instant vector illustrations, for the first time, in real time.

Learn Skills for life

Begin to learn skills on Corel products and you will be learning skills for life. CorelDRAW includes Corel PHOTO-PAINT, Corel Font Manager™ and Corel Website Creator™ so students can create beautiful graphics, materials, images and websites. Corel Painter lets you create stunning digital art. It features more brushes than any other digital art software and is used by many industries including the film, gaming and professional design sectors for story-boarding concepts. Pinnacle Studio allows you to create professional-edge videos. Design for yourself, as part of your course, or for profiling and showcasing the best of your school, college or university.

Simple Administration

The IT department can centrally manage Corel education licenses through an easy-to-use Admin Console to easily deploy the license across a department or entire institution.

Pricing Options

Primary Schools

Corel's Classroom License

For Primary level education, Corel's Classroom License makes a great option, comprising an affordable 15+1 seat "class and teacher" license pack that includes not only CorelDRAW, but also three more of our leading products; Corel Painter, Corel PaintShop Pro and Corel VideoStudio Pro. A perfect option for an ICT suite installation, it provides a full range of tools to assist students with graphic design, photo-editing, video-editing and digital art and illustration projects.

Schools, colleges, universities and academic institutions

Corel Academic Site License

The Corel Academic Site License (CASL) offers incredible value for schools, colleges and universities. It's a subscription license, and the standard CASL includes CorelDRAW plus four more of Corel's leading products: Corel Painter, Corel VideoStudio, Corel PaintShop Pro and Corel PDF Fusion™.

CASL comes as a one or three year site option, covering the whole institution, making it incredible value, and very simple to deploy and administer. What's more students are guaranteed access to the latest products, as upgrades to the latest releases are automatic during the lifetime of the CASL subscription.

A premium version of CASL is also available and includes all of the five leading products plus CorelDRAW Technical Suite and CorelCAD™. Both products are perfect additions for students who are learning technical illustration or technical communication as part of their course.

Education license

If you are looking for a specific product, tailored to serve a set number of users, which can scale to cover a class-room, a department or site-wide installation, our education licenses offer the perfect solution. Priced at four levels, and available across the range of Corel products, the greater the number of student users, the greater the savings.

Since our Education licenses are perpetual, one off purchases, we strongly recommend that you order them in conjunction with CorelSure Maintenance. Not only will you automatically receive the latest upgrades to ensure your students stay learning on the very latest software, but your IT administrator will be able to track and deploy the software with a greater degree of control, based on your sites security requirements.
