

Complete finishing tools for cutting devices

The EFI™ Cut Server and Cut Marks Option for Fiery® proServer and Fiery XF give you the highest return on investment by making your business more productive, and by enabling your company to expand into high-margin applications. Over 1,300 different cutting devices are supported by over 80 manufacturers.

Cut Marks Option

The EFI Cut Marks Option generates and places marks in your job, and can extract multiple cut paths. The option seamlessly connects to the Zünd Cut Center, which ensures a reliable cut workflow by eliminating errors and automating time-consuming tasks.

This option also includes i-cut level 1 and 2 output for maximum flexibility and connectivity to any compatible third party cutting application.

Barcodes can also be automatically created and placed for Esko i-cut, Zünd G3 and S3 series, and Colex cutting devices.

Cut Server Option

The EFI Cut Server Option increases your productivity by seamlessly connecting your job output and your finishing processes. It lets you drive up to eight cutting engines in parallel to meet those tight turnaround times.

In addition, this automated solution standardizes your cutting workflow for all supported cutter types and models.

For a full list of supported cutting devices, and which option they are supported by, visit fiery.efi.com/supporteddevices

System requirements for Cut Server Option

Operating Systems

- Microsoft® Windows® XP Home Edition; XP Professional
- Win 2003 Server Standard; Windows Vista
- Win 2008 Server; Windows 7 (The EFI Cut Server application needs to run on a Windows operating system, but can be accessed by any Windows or macOS Fiery XF client)

Hardware

- 2 GHz Pentium IV PC or higher
- 1 GB RAM per CPU
- 60 GB HDD
- 10/100 MBit Network

Note that the system requirements for the Cut Marks Option are the same as for Fiery Command WorkStation®.

EFI fuels success.

We develop breakthrough technologies for the manufacturing of signage, packaging, textiles, ceramic tiles, and personalized documents, with a wide range of printers, inks, digital front ends, and a comprehensive business and production workflow suite that transforms and streamlines the entire production process, increasing your competitiveness and boosting productivity.
