

SureColor F1000 DTG and DTFilm hybrid printer

The SureColor F1000 is an affordable, desktop, hybrid DTG and DTFilm printer.

This hybrid DTG (Direct to Garment) and DTFilm (Direct to Film) printer, the SC-F1000, is ideal for hobbyists, retailers and small businesses that require a low-cost solution with the flexibility to print on a wide range of fabric types, either light or dark.

The SC-F1000 is the only printer of its type to include a white ink, enabling it to print directly onto dark garments and direct-to-film.

Easy to use, even for new operators

Designed to be used without the need for specialists, the SC-F1000 offers a range of features which ensure easy, accurate printing.

New design concept to suit retail shops

With the flexibility to print on a wide range of fabric types, such as cotton, nylon, leather, polyester, denim and 50/50 blends, the product is ideal for providing in-store services such as personalised garment printing in real-time.

Efficient printing of t-shirts and film

A large opening lid, simplifies the process of setting the garment or film onto the platen, and platen sensors detect uneven settings to avoid printing errors.

High quality without compromising productivity

Image quality is enhanced by the use of Epson's UltraChrome DG2 inks, which reduce bleed from yellow and black, while a vivid colour profile emphasises richness in graphic designs.

KEY FEATURES

- **Compact design**
New hybrid design concept to suit retail and photo retail shops
- **Useability**
Designed with ease of use in mind
- **Productivity**
Efficient printing of t-shirts and film
