

CAPSURE

Portable Color
Identification Tool

Versatile and Convenient Color Tool

CAPSURE accurately reads color on a wide range of surfaces and materials to find the closest match in related color libraries. CAPSURE is lightweight and easy to use. With minimal training, paint department employees can help customers identify colors on walls, carpets, furniture, flooring, clothing — virtually any inspiration object.

CAPSURE provides color recommendations to aid in the customer selection and design process with Harmony Palettes, Similar Colors and Color Navigation, ideal when searching for extra inspiration. It can also isolate colors within a multi-colored pattern for developing matching or complementary color palettes. Color information can be recorded and saved for selecting accent colors or downloaded for in-store paint mixing.

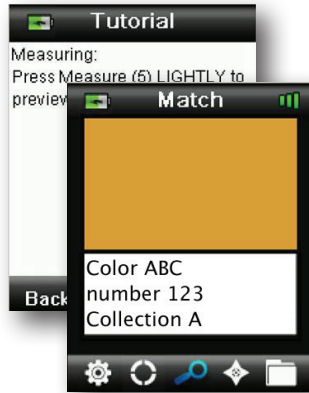

Easy to Use

- Preview samples before measurement; zoom in to manually select specific areas or automatically identify the dominant shades from detailed and multi-colored samples
- Goes wherever you need to go; lightweight and powered with a USB rechargeable battery
- Stores up to 100 measurements and features a built-in microphone to create an audio record for each color
- Proprietary, one-click color identification system accurately identifies color components, quickly cross check the best matches between color collections
- Allows recall saved colors to create custom palettes and merge choices with popular design applications

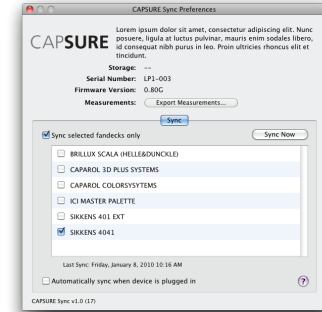

CAPSURE Portable Color Measurement Tool

Portable, Convenient

Intuitive User Interface

Adaptable, Expandable

Specifications

	CAPSURE
Short Term Repeatability - White	Typical 0.2 DE94 on white
