

Color Bridge Guide Set Coated & Uncoated

Ultimate Guide To Convert Pantone Colors To CMYK, HTML, & RGB

SKU GP6102C

The ultimate guide for digital, print, and packaging design, this set allows you to see the appearance of converting a Pantone Spot Color to CMYK. It also features RGB and HTML equivalents for each Pantone Color, including 200+ of our newest shades, from timeless hues to more energetic tones.

Versatility — Translate Spot Colors to CMYK, RGB, and HTML.

Eco-Friendliness — New eco-friendly ink formulation allows for coating Pantone Colors during print production to protect prints and packaging applications.

Portability — Compact, handheld fan deck that includes the 224 newest colors printed on coated paper.

Connectivity — Integration with Pantone Connect for Adobe Creative Cloud, which allows you to take your physical Pantone Colors into your digital workflow.

With the Pantone Color Bridge Guide Set, everyone around the world can create color consistently. Contact your Pantone Account Manager or email sales@pantone.com to learn more.

COLOR SPOTLIGHT: ORANGES

Our new oranges spring from three different worlds: the vibrant and floral, the organic and fruity, and earth inspired, creating a warm and engaging atmosphere.

Inspiration

Create designs for digital, print, and packaging when CMYK process printing is required.

Creation

Easy on-the-go reference provides a visual representation for Pantone Spot Colors translated to CMYK.

Production

CMYK translation enables the process of color matching Pantone Spot Colors.
