

Pantone Formula Guide Coated & Uncoated

The Worldwide Standard Guide For Choosing And Matching Colors

SKU GP1601C

This versatile, end-to-end color matching tool displays 2,614 market-driven spot colors in the Pantone Graphics System on coated and uncoated paper stocks. In addition to being updated with 224 new Pantone Matching System (PMS) colors, it also features five new eco-friendly Pantone base mixing inks compatible with coating in print production processes.

Consistency — Helps ensure consistent color reproduction in design and packaging applications on a range of different materials.

Eco-Friendliness — New eco-friendly ink formulation allows for coating Pantone Colors during print production to protect prints and packaging applications.

Portability — Compact fan decks ideal for easy viewing and portability. Comes with a lighting indicator to ensure colors are being viewed in the correct illumination.

Connectivity — Integration with Pantone Connect for Adobe Creative Cloud, which allows customers to take physical Pantone Colors into digital workflows.

With the Pantone Formula Guide Coated & Uncoated, everyone around the world can create color consistently. Contact your Pantone Account Manager or email sales@pantone.com to learn more.
